API — Airfare Price Index for India

0.1.0OAS 3.1

Real-Time Airfare Price Index for India (API) — SIH 2026 PS 26056 (MoSPI).

Every published value carries `n_obs` and `coverage_pct`, and every response carries the `pipeline_run` provenance stamp (code version, git SHA, methodology config hash, input row count) needed to reproduce it.

Methodology proof of concept. Not an official government statistic.

index

Schemas

^

BasePeriod ^ Collapse all **object**

end* ^ Collapse all **(string | null)**

Any of > Expand all **(string | null)**

n_days* **integer**

start* ^ Collapse all **(string | null)**

Any of > Expand all **(string | null)**

DataModeSummary ^ Collapse all **object**

Real-vs-synthetic lineage. Present on every index response by design.
A consumer must never have to guess whether a series is a measurement or a simulation, so this travels with the data rather than living in a README.

banner ^ Collapse all **(string | null)**

Non-null when the dashboard must show a demo-data warning.

Any of > Expand all **(string | null)**

counts* ^ Collapse all **object**

Additional properties **integer**

is_demo_data* **boolean**

`real_share* number`

`synthetic_share* number`

`total_rows* integer`

HTTPValidationError ^ Collapse all `object`

`detail` ^ Collapse all `array<any>`

Items > Expand all `any`

HeadlineResponse ^ Collapse all `object`

`base_period*` ^ Collapse all `any`

\$ref=#/components/schemas/BasePeriod

`count* integer`

`data_mode*` ^ Collapse all `any`

\$ref=#/components/schemas/DataModeSummary

`dow_adjusted* boolean`

`freq` ^ Collapse all `string`

daily | weekly | monthly

Default `"daily"`

`pipeline_run*` ^ Collapse all `any`

\$ref=#/components/schemas/PipelineRunModel

`points*` ^ Collapse all `array<any>`

Items > Expand all `any`

`series* string`

HealthResponse ^ Collapse all `object`

`code_version* string`

`data_available* boolean`

`data_mode` ^ Collapse all `(any | null)`

Any of > Expand all `(any | null)`

`hours_since_latest_index` ^ Collapse all `(number | null)`

Age of the most recent index point. A stale series looks identical to a flat one on a chart, so the age is published rather than inferred.

Any of > Expand all `(number | null)`

`latest_index_date*` ^ Collapse all `(string | null)`

Any of > Expand all `(string | null)`

`status* string`

HeatmapResponse ^ Collapse all `object`

Route x date grid, pre-shaped so a heatmap component needs no reshaping.

`baseline* number`

`data_mode*` ^ Collapse all `any`

\$ref=#/components/schemas/DataModeSummary

`dates*` ^ Collapse all `array<string>`

Items `string`

`matrix*` ^ Collapse all `array<array<(number | null)>>`

matrix[i][j] = routes[i] on dates[j]; null = no index, NOT zero.

Items > Expand all `array<(number | null)>`

`note* string`

`route_names*` ^ Collapse all `array<string>`

Items `string`

`routes*` ^ Collapse all `array<string>`

Items `string`

`value_max*` ^ Collapse all `(number | null)`

Any of > Expand all `(number | null)`

`value_min*` ^ Collapse all `(number | null)`

Any of > Expand all (number | null)

IndexPoint ^ Collapse all object

coverage_pct* ^ Collapse all number

Share of the expected sample present.

date* string

expected_days ^ Collapse all (integer | null)

Days a complete period would contain. Weekly/monthly only.

Any of > Expand all (integer | null)

is_complete ^ Collapse all (boolean | null)

False for a partially-observed period. Render these distinctly — a 14-day month plotted beside a 31-day month is not comparable.

Any of > Expand all (boolean | null)

matched_n ^ Collapse all (integer | null)

Matched pairs entering the elementary aggregate (headline only).

Any of > Expand all (integer | null)

n_days ^ Collapse all (integer | null)

Daily observations aggregated into this point. Weekly/monthly only — a weekly point built from 3 days is not the same statistic as one built from 7.

Any of > Expand all (integer | null)

n_obs* ^ Collapse all integer

Index-eligible observations behind this point.

value* number

LeadtimeCurvePoint ^ Collapse all object

advance_days* integer

relative_level* number

LeadtimeCurveResponse ^ Collapse all object

as_of* ^ Collapse all (string | null)

Any of > Expand all (string | null)

curve* ^ Collapse all array<any>

Items > Expand all any

note ^ Collapse all (string | null)

Any of > Expand all (string | null)

reference_window* ^ Collapse all (integer | null)

Any of > Expand all (integer | null)

LeadtimeIndexResponse ^ Collapse all object

note* string

pipeline_run* ^ Collapse all any

\$ref=#/components/schemas/PipelineRunModel

windows* ^ Collapse all array<any>

Items > Expand all any

LeadtimeWindow ^ Collapse all object

advance_days* integer

points* ^ Collapse all array<any>

Items > Expand all any

PipelineRunModel ^ Collapse all object

code_version* string

config_hash* string

created_at* string

git_sha* string

index_eligible_rows* integer

```
